Implementation & CX Operations Leader | Systems Builder & Transformation Driver

Implementation and Customer Experience leader with 8+ years of experience in enterprise SaaS and AI, specializing in onboarding strategy, process design, and cross-functional delivery. Proven track record of leading complex implementations, establishing Time-to-Value (TTV) frameworks, and building scalable systems that improve customer outcomes and operational efficiency. Led 90% of enterprise client implementations and introduced Time-to-Value (TTV) metrics, reducing onboarding timelines to 3 months. Known for bringing structure to complex environments by aligning Product, Engineering, and Customer Success teams and translating business and technical requirements into measurable execution and outcomes. Owns implementation strategy from sales handoff through production deployment, ensuring alignment between technical delivery and business outcomes.

Technical Skills

SaaS Platforms | AWS | Microsoft Azure | Google Cloud Platform | API Integrations | Salesforce (CRM) | Catalyst | Zendesk | Conversational AI (Rasa) | AI/ML & LLM Solutions | Data Analysis | Jira | Implementation & Deployment

PROFESSIONAL EXPERIENCE

Rasa, Atlanta, Georgia (Remote) | 2023 – Present

Senior Customer Success Manager | Implementation Lead

Drive enterprise **implementation strategy and delivery governance** across high-value SaaS portfolios. Partner cross-functionally with Product, Engineering, and Professional Services to align customer outcomes with structured execution and scalable delivery.

- Introduced and operationalized Time-to-Value (TTV), reducing onboarding timelines to 3 months and establishing a scalable benchmark for implementation success.
- Led implementation for 90% of new enterprise clients in first year, establishing scalable onboarding and delivery practices.
- Streamlined Sales → CS handoff, introducing structured intake and deployment alignment to reduce onboarding friction
- Designed and implemented a deployment readiness checklist (Helm/Kubernetes), improving clarity and reducing delays in complex client environments.
- Served as Scrum Master and delivery lead for enterprise migration (JPMC), facilitating standups, retrospectives, and removing cross-functional blockers.
- Drove large-scale migration initiatives (e.g., ADUSA), including SOW creation, phase gates, project planning, and execution timelines.
- Acted as primary liaison across CSE, FDE, Managed Services, and client stakeholders, ensuring aligned delivery execution.

CX Systems & Operations Leadership

- Served as Catalyst POC, defining standardized CS metrics, fields, and usage frameworks to improve data consistency across accounts.

- Built cross-functional dashboards in Catalyst, enabling Product, Engineering, and leadership to access customer insights without CSM dependency.
- Expanded user access and permissions, improving visibility and reducing reporting bottlenecks.
- Acted as Zendesk POC, supporting workflow optimization and vendor discussions.
- Improved customer portal documentation, reducing confusion and unnecessary escalations in a complex on-prem environment.

Escalation, Risk, and Leadership

- Built a product escalation framework prioritizing issues by ARR and business impact, improving visibility and response to critical risks.
- Translated customer issues into actionable Jira tickets, aligning with engineering for faster resolution.
- Recovered a high-risk enterprise account by mediating internal conflict and rebuilding client trust.
- Selected to lead a top-tier U.S. account, securing system access and stakeholder engagement needed to continue delivery.

Oversight Systems, Atlanta, Georgia | 2021 – 2023

Senior Customer Success Manager

Owned full customer lifecycle across a \$2M ARR portfolio, serving as primary escalation lead and implementation advisor from deployment through multi-year renewals. Drove seamless cross-functional execution across Sales, Delivery, and Support to protect retention and accelerate customer value.

- Led end-to-end implementation lifecycle from sales handoff through go-live, ensuring seamless transitions and eliminating operational disruptions to protect first-year retention.
- Acted as primary escalation point for high-impact client issues, mobilizing cross-functional teams to resolve complex challenges and maintain executive-level relationships.
- Exceeded Q3 2021 revenue targets by 10% through strategic account expansion, leveraging deep implementation insight to identify adoption gaps early.
- Identified renewal risks and growth opportunities through structured account health reviews, deploying data-driven action plans that improved retention and increased account value.
- Delivered tailored solutions to complex technical and operational challenges, serving as a trusted advisor to both technical stakeholders and executive leadership.

LeaseQuery (FinQuery), Atlanta, Georgia | 2020 – 2021

Product Owner (Promoted from Lead Customer Solutions Manager)

Led product strategy and delivery for two Agile Scrum teams, translating customer implementation insights into scalable product enhancements. Partnered with Engineering and Customer Success to align roadmap priorities with real-world deployment needs and accelerate time-to-value for enterprise clients.

- Defined user stories and acceptance criteria based on live implementation data, ensuring releases were deployment-ready and aligned to customer requirements.
- Delivered product enhancements that drove an 85% improvement in key business metrics, validated through adoption analytics and post-implementation feedback.
- Led UAT, system integration, and QA efforts, ensuring seamless go-live execution and minimizing disruption across client deployments.
- Leveraged market research and performance analytics to prioritize roadmap initiatives, translating customer insights into data-driven product decisions.

LeaseQuery (FinQuery), Atlanta, Georgia | 2019 – 2020

Lead Customer Solutions Manager

Led enterprise onboarding, implementation, and customer success initiatives, driving product adoption, retention, and long-term client value. Partnered cross-functionally with Product, Sales, and Engineering to translate customer feedback into scalable solutions and product improvements.

- Built and operationalized CS playbooks, standardizing issue resolution and improving consistency across the team
- Developed Zendesk response templates, enabling scalable and structured customer communications
- Led CS platform evaluations and POCs, partnering with vendors to assess tooling for scalability and efficiency
- Conducted pricing analysis and vendor negotiations, presenting recommendations to leadership
- Identified opportunities to scale CS operations through tooling, workflows, and process improvements

Optima Healthcare Solutions, Atlanta, Georgia | 2017 – 2018

Customer Success Manager

Led customer success strategy for Home Health product initiatives, serving as SME and Project Manager to drive implementation, adoption, and long-term client outcomes. Partnered cross-functionally to ensure seamless onboarding, delivery, and post-implementation success.

- Managed a \$3M portfolio, driving retention, satisfaction, and growth through strategic account management and consultative client engagement.
- Built trusted advisor relationships across client organizations, supporting retention and expansion.
- Conducted strategic check-ins and value presentations to align product usage with business outcomes.
- Led onboarding and post-implementation transitions, ensuring long-term customer success.

Elsevier, Atlanta, Georgia | 2014 – 2017

Client Engagement Analyst

Supported enterprise client onboarding and implementation for clinical solutions, managing large-scale deployments across hospitals and health systems. Partnered with Product, Sales, and Operations to drive adoption, optimize workflows, and improve client outcomes.

- Managed concurrent deployments across a \$7M portfolio, including data migration, training, and go-live support for large healthcare organizations.
- Implemented enterprise Content Management System across 175 hospitals and health systems, improving workflow standardization and operational efficiency.
- Designed and delivered upgrade training programs for 75+ clients, ensuring smooth transitions with minimal disruption to clinical workflows.
- Contributed to the acquisition of a \$250K net-new software account through targeted pre-sale implementation alignment and solution positioning.
- Partnered with vendors to execute CS platform POCs, aligning tooling capabilities with business needs
- Supported vendor selection and pricing discussions, balancing cost, functionality, and long-term scalability
- Presented findings to leadership, influencing CS technology investment decisions
- Identified process improvements to enhance customer management workflows and team efficiency

Rollins, Atlanta, Georgia | 2008 – 2014

National Account Team Lead

Led national accounts support and training initiatives, developing foundational expertise in enterprise account management, customer communication, and service delivery. Supported large-scale client operations while driving process consistency, escalation resolution, and team performance.

- Supervised a 6-person customer coordination team, optimizing workflow, task prioritization, and performance to improve service delivery and team effectiveness.
- Increased customer scorecard performance from **20% to 96% within four months** by designing and implementing standardized processes and engagement playbooks.
- Strengthened client relationships and improved communication cadence while overseeing internal and external reporting across key performance metrics.
- Designed and implemented an end-to-end process for customer website and billing management, resulting in the recovery of \$90K+ in past-due revenue.

EDUCATION

Bachelor of Arts, English, Excelsior College
